

PROPER PICKUP INSTALLATION GUIDE

STRATOCASTER STYLE

Solder black wire to Ground, then solder white or yellow wire to Hot.

HUMBUCKER STYLE

We offer all our Humbuckers with a 4-conductor wire to help you explore all wiring options. For standard series wiring, solder green and red wires together and insulate that connection. Solder white wire to Hot, and black and bare wires to Ground.

TELECASTER STYLE

Solder black wire to Ground and white wire to Hot.

P-90 STYLE

Solder white wire to Hot. Solder red and bare wires to Ground.

PRECISION AND JAZZ BASS STYLE

Solder white wire to Hot and black wire to Ground.

For best results, adjust pickup height. Personal preference is an important factor but certain physical aspects must be considered as well: string gauge, string material, string pitch, player's technique, and the pickup's magnetic string pull. Therefore, we highly recommend that all installations and adjustments of Coils Boutique Pickups be done by professional and certified guitar technicians.

For questions or comments regarding the installation and adjustments of pickups, please contact us on Facebook, or mail us at service@coilsboutique.com. We'd love to assist.

The Coils Boutique name guarantees that this product is free of defects.

Should you discover any manufacturing problems or defective components in this product, please contact us and send the pickup via registered mail to Coils Boutique and we will do our best to repair or replace it as soon as possible.

This guarantee does not cover wear and tear of pickup covers, misuse, improper installation and handling, or any attempt to repair or modify the product by unauthorized individuals.
